

# MODEL AS DESTONER

**FORSBERG**

Compact, all steel construction, simplified controls, smooth operation, describe the Forsberg Model AS DeStoner. This small workhorse from Forsberg's line of density separators, will provide a gravity separated product, liberated and pure of heavy foreign material and many years of dependable service. Its other big features are; long lasting rubber bushings, an enclosed finely counterbalanced drive, easy cleaning and requires a minimum of maintenance.

The Model AS is an efficient and inexpensive method of obtaining a distinct product separation on a small volume basis.
